To Whom It May Concern:

The Kevin O'Leary Motor Group has dealt with Digital Forecourt for the past 2 years and we use their software in 2 of our main car dealerships. Since the outset I have found the company thoroughly professional to deal with across all aspects of their business from day one installation to ongoing software support.

Through regular feedback from us they have developed their package to meet our changing needs with regular software updates and bulletins. I would have no hesitation in recommending Digital Forecourt to anyone that requires a competent and dedicated supplier.

Yours truly,

John O'Halloran.
Financial Controller.
